

How to Qualify for the Commercial Bin or Cart Bundling Program

CVSAN
COMMERCIAL
BUSINESSES

Minimize Garbage Collection Costs by Maximizing Recycling and Organics Collection Services!

Commercial customers can choose a reduced rate 2-material bundle that best fits their needs. Current bundled accounts will be audited; there may be adjustments to billing and services.

COMMERCIAL BUNDLING PROGRAM:

1. Pick your first container.

- For a BIN BUNDLE, containers must be between 1 - 3 cubic yards (cy) in size. Containers over 3 cy will not qualify for bundling.
- For a CART BUNDLE, containers must be between 20 - 96 gallons (gal) in size.
(20 gal available for garbage only)

2. Pick a second container.

- Second container must match the first container type (bin or cart), quantity and frequency.
- If the second container size exceeds the size of the first container, a per cubic yard or per gallon (bin or cart) supplemental fee for the additional capacity will apply. (If a 20-gal garbage cart is chosen as the first container, 32-gal carts shall be provided for bundled recycling or organic material without incurring supplemental fees.)
- If the second container requires a higher collection frequency than the first container, the additional service will be charged at an A LA CARTE rate.

3. Need a third material?

- Collection for unbundled materials (any container, size or frequency) can be added. An A LA CARTE rate applies.

***PLEASE NOTE: Bins and carts cannot be combined in a single bundle. A customer can have multiple separate bundles (bin bundles and cart bundles) on one account.**
